Georgian Bay Canal Survey: Extra Pay.

AUDIT OFFICE, OTTAWA, July 6, 1909.

SIR,—Let me call your attention to two payments to officials of your departmental staff, for extra work in connection with the Georgian Bay canal survey, charged to 1908-9.

The payments are as follows:—

E. D. Lafleur: Remuneration for labour and responsibility entailed in the preparation of plans, surveys, &c., for proposed Montreal, Ottawa and Georgian Bay canal, full and final settlement $4,000; less previous payment, cheque B—47599—$1,500 . . . . . $2,500

A. St. Laurent: Same description 2,500

On reference to sec. 38 of the Civil Service Amendment Act of 1908, it will be seen that all extra remuneration to permanent officials needs to be specifically voted by name, before payment can be made.

It will be necessary, I think, to refund these sums, until the requisite authority of parliament is obtained.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, July 16, 1909.

SIR,—Replying to your favour of the 6th instant, relative to two payments to the Assistant Deputy Minister and the Chief Engineer of this department, in connection with the Georgian Bay canal survey, I beg to say it is considered section 38

of the Civil Service Amendment Act for 1908 does not apply to these payments, for the reason that the work covered by them was performed previous to the passing of the Act in question, and further, payment was made from last year's appropriation which distinctly provided that such payment could properly be made notwithstanding anything in the Civil Service Act.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

St. John, N.B.: Sand Point Slip: Removing Boulders.

AUDIT OFFICE, OTTAWA, March 27, 1909.

SIR,—Let me acknowledge receipt of your application No. 1261 for $12,952.70 in favour of the Maritime Dredging and Construction Co., for removing boulders, &c., from No. 6 berth, Sand Point slip, St. John, N.B., between November 20, 1908, and February 11, 1909.

Removing Large Boulders at $19.90 a yard.

Engineer Scammell reports: 'The material removed fro mthis berth was practically all on the site of the operations of the Dominion Dredging Co., which site, at the time of the acceptance of their work last April, was down to grade, namely, 32 ft. at low water of ordinary spring tides, and they (the Dominion Dredging Co.) had satisfactorily completed all of the dredging which they were required to do.

The details of the $12,952.70 claim are as follows:—

1. Boulders over 2 cubic yards—	
647·33 c. y. at $19.90	$12,881 93
2. Boulders under 2 cubic yards—	
7·67 c. y. at $5.60	42 94
3. Ordinary spoil—	
55·67 c. y. at 50 cents	27 83
	$12,952 70

Mr. Scammell explains his reasons thus, for pricing the large boulders at $19.90 a cubic yard: 'As the work of the Maritime Dredging and Construction Company was on the site covered by the contract of the Dominion Dredging Co., the same classification would apply; and it has therefore been used. * * * * The price of 50 cents per cubic yard for class 3 was made by the Hon. Minister of Public Works in connection with the work being done by Mr. J. S. Gregory; but as no arrangement has been made by him with reference to classes Nos. 1 and 2, I have applied the same price as was allowed the Dominion Dredging Co., and Mr. G. S. Mayes for their work in that section of Sand Point.'

The $340,895.20 paid to the Dominion Dredging Co. is divided at page V—200 of the 1908 Report, as follows:—

1. Boulders over 2 cubic yards—	
990 c. y. at $19.90	$19.701 00
2. Boulders under 2 cubic yards—	
56 c. y. at $5.60	313 60
3. Ordinary spoil—	
356,534 c. y. at 90c	320,880 60

The boulders are 5·87 per cent of.. .. .. $340,895 20;
and 99·78 per cent of $12,952.70.

The tender-schedule of the original contract, namely, $19.90, $5.60 and 90c., is evidence as to the fairness of the price of 90 cents for ordinary spoil, on 94·13 per cent of the total work; it is not evidence as to the fairness of $19.90 and $5.60 for the other 5·78 per cent and ·09 per cent, respectively, for large and small boulders.

Please obtain from the contractor a detailed statement of his expenses for plant and labour; and after allowing a good profit, see how it compares with the bill of $12,952.70 for the work entered in the returns.

Mr. Mayes should Pay Damages.

The boulders covered by the Maritime Company's claim were found on both sides of the line between the Dominion Dredging Co.'s work and that of Mr. Mayes; but Engineer Scammell demonstrates that they must have all been left by Mr. Mayes' dredge. Although settlement is made by scow-measurement of excavation, the purpose of the contracts is to secure safe and deep navigation. If this result has not been reached owing to a contractor's negligence, a fine should be imposed on him.

Two large Boulders not taken away.

Boulders lettered 'N' and 'O' on sheet No. 7, of 132⅔ and 99⅔ cubic yards respectively, were not taken away three miles and dumped as provided by the general specification; but a hole was dredged along side of them and they were rolled into the hole, leaving them now 36 feet below low water in a 30-foot navigation system.

This may suit the present depth; but if subsequent dredging is ever required, these rocks may have to be moved again, whereas they would be out of the way for good if the contractor had done all the work for which the $1990 is supposed to pay him.

His claims for moving these two rocks are $2,640.13 and $1,983.43, respectively.

Assistance rendered by Dredge 'Fielding.'

Mr. Scammell's description of boulder 'N' is as follows: 'A boulder 16 ft. x 16 ft. x 14 ft., of which, when found, the diver reported only the point was above the surface of the ground; it could not be removed, and the *Fielding* was employed in an attempt to loosen it; and the bottom of the stone was not reached until a depth of 16 ft. had been obtained. As it could not be raised to the lighter, it was found advisable to continue deepening the hole in which the boulder was finally placed, and there is now 36 ft. at low water over it. This boulder amounted to 132⅔ cubic yards.'

Concerning boulder 'O' he says: 'A boulder 16 ft. x 14 ft. x 12 ft. = 99⅔ cubic yards, lying directly alongside of 'N.' This was treated in the same manner as the previous one, and now lies in 36 feet of water.'

The final soundings south of these boulders, as shown on sheet No. 4, reads thus:

33·1	33·8	33·8	34·6	34·3	36·0	37·6	38·3
34·2	41·0	41·8	45·6	45·3	47·0	47·5	37·1
35·6	40·0	43·2	*36·6*	*36·3*	45·0	46·5	46·1
34·2	39·0	43·8	45·6	46·3	45·0	44·5	45·1
34·0	39·0	42·8	45·6	44·3	44·0	44·5	43·1
34·0	34·0	34·8	35·5	43·3	39 0	43·5	

Most of the other soundings range about 33 and 34 feet. We infer that 36·6 and 36·3 are the present positions of the boulders, and that the surrounding cavity was

dredged out to receive them. If this was done by the government dredge *Fielding*, as seems possible from Mr. Scammell's explanation, there should be a corresponding reduction from the Maritime Company's voucher or a cash refund.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

St. John, N.B., April 6, 1909.

Sir,—In reply to your letter No. 9248, dated the 31st ultimo, I beg to report with reference to:

Removing large boulders at $19.90 per yard.

Mr. Hayter gives details with reference to the yardage and prices of the contract with the Maritime Dredging and Construction Company, and compares it with the previous contract of the Dominion Dredging Company, Limited, for work in the near vicinity. I would respectfully point out that the reasoning as to fairness of price cannot hold. Taking the figures supplied, I append the following table:—

MARITIME DREDGING AND CONSTRUCTION COMPANY.

	Material.	Cubic Yards.	Price.	Cost.	Percentage of Total Cost.	Percentage of Boulders to Total Cost.
			$	$	p. c.	p. c.
1	Boulders over 2 cubic yards	647·33	19 90	12,881 93	99·45	
2	Boulders under 2 " "	7·67	5 60	42 94	·33	
3	Ordinary spoil	55·67	0 50	27 83	·22	99·78
				12,952 70	100·00	

DOMINION DREDGING COMPANY, LIMITED.

1	Boulders over 2 cubic yards	990	19 90	19,701 00	5·78	
2	Boulders under 2 " "	56	5 60	313 60	0·09	
3	Ordinary	356,534	90	320,880 60	94·13	5·87
				340,895 20	100 00	

In the case of the Maritime Dredging and Construction Company the boulders represent 99·78 per cent of their contract, while in that of the Dominion Dredging Company, Limited, the total boulders removed are but 5·87 per cent of theirs; the inference is that the former company had to perform 99·78 per cent of their work in the most difficult portion of the dredging that has been done in St. John harbour, the removal of large boulders to a depth of 30 feet at low water, and had but 0·22 per cent of excavation in ordinary spoil or dredging in silt, sand, mud or clay, where they might work with some profit and little damage beyond the usual wear and tear of their machinery, whilst the latter company had to do but 5·87 per cent of excavation in difficult dredging and 99·13 per cent was in most profitable digging.

I would further point out that there was but an imaginary line between the two contracts, and had the whole work been on that of the Dominion Dredging Company's work the boulder portion would all have been removed at $19.90 and $5.60 per yard. It is, therefore, reasonable to assume that if there was fairness in the price on the

original contract, that that is of itself evidence as to the fairness of price of the Maritime Dredging and Construction Company, who later went in on the work.

A detailed statement of the expenses of the contractor for plant and labour is attached to this report.

Two large boulders not taken away.

The boulders lettered 'N' and 'O' on sheet No. 7 were not taken to the place for deposit of spoil, some three miles distant, owing to the fact that there were no appliances available to lift these stones out of the water so that they might be placed on board of a lighter and removed. The city officials were pressing for the use of the berth, and after full discussion with the late superintendent of dredges and the contractors, it was deemed advisable to dredge out the hole to a sufficient depth so that in the event of the breaking of the chains while lifting the boulder it would be dropped into it. It is estimated that the boulder 'N' weighed in the vicinity of 300 tons. Each time the sling chains were attached by the diver and the strain put upon them, the moment the engine started they invariably broke. It was finally decided to allow the rise of the tide to exert its influence, and after placing the sling around the boulder at low water, the slack from the chains was taken up, and as the tide rose the stone was broken out from its bed and gradually lifted. It was then moved over to the hole prepared for it in the event of accident, and as soon as the hoisting engine started in the endeavour to place the boulder on the lighter the strain became too great, parting the chain, and depositing the boulder in a depth, as stated, of 36 feet at low water. This was quite suited, not only to the present depth required, but for subsequent dredging as well, as the extension of the dock system in St. John now under way will care for the deeper draught steamers, and it is not probable that a greater depth than 30 feet will ever be required at No. 6 berth.

Assistance rendered by Dredge 'W. S. Fielding.'

The dredging performed by the *W. S. Fielding* at berth No. 6 was done in the interest of the maritime trade at large, and had the dredge not been available it would not have been possible to remove the two boulders N and O without causing a great deal of delay and added expense, it would therefore not appear reasonable to charge this work to the Maritime Dredging and Construction Company. However if this were done it would amount to about $750 as the time spent by the *Fielding* on these two boulders amounted to six days, at an expenditure of $125 per day. This information being obtained from Mr. T. H. Adams, acting superintendent of dredging.

I am, sir, your obedient servant,

The Chief Engineer, Dept. Public Works J. K. SCAMMELL, *R.E.*

MARITIME DREDGING AND CONSTRUCTION CO., ST. JOHN, April 6, 1909.

DEAR SIR,—We beg to acknowledge the receipt of your favour under date of 5th inst., and inclose herewith statement of expenses, wages, &c., for the work done at No. 6 berth, Sand Point:—Wages, diver, helpers, &c., $4.490.28; Union Iron Works, $65.55; Adams, $5.50; James Knox, water, $450; diving mitts, $19.50; diving suit, $56; Elliott acct., $24; carpenters, $26.25; J. A. Likely, $13.52; Dominion Coal Co., $283.75; St. John Iron Works, $200; McAvity, $78.46; Imperial Oil Co., $49.08; T. Donovan, $244.11; Total $6,006.

We may state that we commenced this work on November 25, 1908, and completed it February 15, 1909. In addition to the expense bill of $6,006, there would

also be the time between these dates for continuous service of a tug, as well as the continuous use of the dredge.

We think on comparison you will find the amount of remuneration received by our company has not been at all excessive.

Yours faithfully,

Maritime Dredging and Construction Company.

J. K. Scammell, Esq., Resident Engineer

Audit Office, Ottawa, June 3, 1909.

Sir,—Let me acknowledge receipt of Engineer Scammell's letter concerning the claim of $12,952.70 by the Maritime Dredging Co., for removing boulders from No. 6 berth, Sand Point slip, St. John harbour.

The contractors give an expense bill of $6,006, and add: 'There would also be the time between November 25 and February 15 for continuous service of a tug, as well as the continuous use of the dredge.' The expenses incurred by the contractors under these heads should be calculated, approved by the Engineer, and added to the bill of $6,006, to make the comparison suggested at Page 2 of our letter of March 27.

If the payment is finally passed on the basis of $19.90 for removing and towing-away boulders according to specification, there will need to be two deductions: one of $750 for services of Dredge *Fielding,* as estimated by Engineer Scammell; and another to be calculated by the department, for shortage in work performed, namely, dropping the two large boulders instead of carrying them out to sea.

I am sir, your obedient servant,

The Deputy Minister, Public Works, FREDERICK HAYTER, *for A.G.*

St. John, N.B., June 15, 1909.

Sir,—In reply to your letter No. 1719, Sand Point Slip, St. John Harbour, N.B., dated 8th instant, *re* boulders at No. 6 berth, I beg to inclose a bill of expenses for the services of the tug and dredge between November 25 and February 15, in order that the comparison suggested at page 2 of the letter from Mr. Frederick Hayter, pro Auditor General, dated March 27 last, can be made.

I also inclose an account as suggested making the two deductions, one of $750 for services of dredge *Fielding* and another calculated for shortage in work performed, namely, dropping the two large boulders instead of carrying them out to sea, amounting to $31.25, a total of $781.25.

I am, sir, your obedient servant,

The Chief Engineer, Dept. Public Works. J. K. SCAMMELL, *R.E.*

St. John, N.B.: Dredging on Western Side of Harbour.

AUDIT OFFICE, OTTAWA, August 24, 1909.

SIR,—I have received a copy of contract dated May 10, 1909, with the Maritime Dredging and Construction Co., for dredging on the western side of St. John harbour. I have also received a copy of an order in council dated February 16, 1909, awarding the contract to the above company.

The order in council quotes the prices tendered by this company, the Dominion Dredging Company and G. S. Mayes. The Maritime Dredging and Construction Co.'s tender is: (1) 'Rock or boulders exceeding 2 c.y., $5; (2) All other materials: Beacon bar, 50c., and Courtenay bay, 35c., per c.y.; (3) Cast over rock exceeding 2 c.y., $5; (4) All other materials, 35c.'

The Dominion Dredging Co.'s tender is: '(1) $4.90; (2) 39½c.; (3) $3; (4) 30c.

The specification and tender attached to the Maritime Dredging and Construction Co.'s contract and marked 'lowest tender,' reads: (1) $4.90, (2) 39½c., (3) $3; (4) 30c. These prices are the same as those quoted in the order in council as tendered by the Dominion Dredging Co., and not by the Maritime Dredging Co., and there is no mention made in the tender attached to the contract of the Maritime Dredging Company of any prices for Courtenay bay, although the contract stipulates that this company agrees to '*oblige themselves to perform the work of dredging Courtenay bay at the price named in their tender.*'

The contract, therefore, appears to me to be incomplete without having attached to it the tender of the Maritime Dredging Co., wherein they offer to do the work at Courtenay bay.

I have, therefore, to request that you will send me a certified copy of their tender in which they offer to do this work.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Escoumains: Wharf Extension: Thos. P. Charleson.

AUDIT OFFICE, OTTAWA, February 1, 1909.

SIR,—Let me acknowledge receipt of your application No. 1161 for $3,137.50 in favour of Mr. Thos. P. Charleson, for extra work on 'Escoumains wharf extension,' the main contract for which was $12,445.

The details of the voucher are as follows:—

Extra work—27,500 cu. ft. of cribwork at 8½c.	$2,337 50
Removal of rocks—800 cu. yds. at $1.	800 00

Extra Cribwork: 27,500 cu. ft.

Mr. Charleson's original claim was for 8 ft. additional height on the 200 x 25 ft. wharf extension, or 40,000 cubic feet. Engineer Taché 'finds by careful measurements that the additional work amounts to 27,500 cubic feet.' He states that 'the extra height was rendered necessary by scouring, and also because of a difference found between the soundings on which the contract plans were prepared, and those taken when construction work was commenced.'

Extracts from Specification.

Section 4. Soundings.—'The soundings and levels shown on plan have been carefully taken, and are supposed to be correct; but contractors are required to test their accuracy, and take any other soundings they may deem necessary; for it must be distinctly understood that, after signing the contract, the contractor will be held entirely responsible and liable for the consequences of any error which may at any time be discovered. The contractor, before tendering, must make his own tests, and satisfy himself as to the nature of the bottom, as no claim for extra will be entertained on account of increased sinkage not shown on the plan.'

Section 8. Price.—'The price stated by the contractor in his tender is to be taken as that upon which alone he agrees to be paid for all the materials required, and for all works embraced in this specification and the accompanying plan. This price will be held as rigidly inclusive of and covering all failures, accidents, contingencies, plant, machinery, labour and materials, erection of buildings and false work if required, and all damage that may be done to the work or any portion of it, or to plant or tools provided and employed, either by gales, storms, scouring blasting, settlement, ice or fire, or any other cause whatever, up to its completion and acceptance by the engineer in charge.'

Cribwork-claim is shut out by Specification.

The engineer's two reasons for allowing this claim, namely, 'scouring' and 'difference in soundings,' are, therefore, foreseen and invalidated by the specification, namely, 'scouring' by section 8, and 'difference in soundings' by section 4.

If the department still wishes to press for payment of this item, we will need details of the calculation of the 27,500 cubic feet, and of the 8½c. rate; a full report from the officers who took the soundings, with an explanation (if possible) of the manner in which the mistake occurred; and a description of whatever steps have been taken to prevent recurrence of a similar error.

Removal of Rocks: 800 cu. yds.

Engineer Taché reports: 'Mr. T. P. Charleson was never authorized by me to remove rocks from the approach. I was never consulted for this work. I know for a

fact that the work was done, which work is very useful to reach the wharf.'

Under section 5 of the contract, 'The contractor shall not make any change in or addition to * * * * the works, and shall not be entitled to any payment for any change, addition * * * * or any extra work, unless such change, addition * * * or any extra work shall have been first directed in writing by the engineer, and notified to the contractor in writing, nor unless the price to be paid for any addition or extra work shall have been previously fixed by the engineer in writing.'

Under this section of the contract, we are unable to recognize the claim, since there was no written authority from the engineer.

Did the 800 yards of rock go into the cribwork?

I am, sir, your obedient servant,

The Deputy Minister Public Works. FREDERICK HAYTER, *for A.G.*

Resident Engineer's Office, Chicoutimi, Nov. 11, 1909.

Sir,—I have your letter No. 6147, dated October 19, 1908, with reference to Contractor T. P. Charleson's claim of $5,000 additional work done at Escoumains wharf in connection with his contract, and also calling my attention to a letter from Mr. A. St. Laurent, assistant deputy minister, asking for further information and suggesting that as this is a matter for final adjustment, I should go myself, inspect the work, or one of my assistant engineers, check the measurements and report.

I have sent Mr. A. O. Beauchemin, my assistant, to Escoumains, with instructions to take soundings, and to be very careful with his measurements, Mr. Beauchemin, on his report states that he found 27,500 cubic feet or more work, which at 8½c. a foot makes $2,337.50, he estimates the removal of rock at $1 a yard, he found out 800 yards which make $800, forming a total of $3,137.50.

I am, sir, your obedient servant,

The Chief Engineer, Dept. Public Works. J. C. TACHE, *R.E.*

Resident Engineer's Office, Chicoutimi, March 9, 1909.

Sir,—I have the honour to give the necessary details as to the calculation of the 27,500 c.f., and of the 8½c. (for plan, see report of November 10, 1908).

Height of wharf from bottom to top of floor as per plan—
South end, 32 feet 6 inches; north end, 25 feet.
As per soundings: South end, 37 feet 6 inches; north end, 31 feet.
Difference in height, extra: South end, 5 feet; north end, 6 feet.
Length of wharf, 200 feet by 25 feet in width.

$$\frac{6' + 5'}{2} \times 25' \times 200' = 27{,}500 \text{ C.F. at } 8\tfrac{1}{2}\text{c.} = \$2{,}337.50.$$

Number of cubic feet as per contract plan—

$$\frac{32'\ 6'' + 25'}{2} \times 25' \times 200' = 143{,}750 \text{ c.f.}$$

Amount of contract, $12,445.

12445÷143,750=8 13/20c., or 8½c. to facilitate the calculation of estimates.

I am, sir, your obedient servant,

J. C. Taché, Resident Engineer. A. O. BEAUCHEMIN, *Asst. R.E.*

RESIDENT ENGINEER'S OFFICE, CHICOUTIMI March 9, 1909.

SIR,—I have your letter No. 8264, dated February 12, inclosing file 328,833 (and seven other departmental files) in which the Auditor General acknowledges application No. 1161, for $3.137.50, in favour of Thos. P. Charleson, for extra work on Escoumains wharf extension and asks for additional information, and to let you have a report on the desired information.

The error in the soundings, must be as far as I can ascertain by the establishment of the gauge.

As regard to the rock mentioned in the Auditor General's letter, the rock was used in the cribwork.

I send you herewith the calculation of the 27,500 c.f. of extra contain, and also the calculation of the 8½c., being the percentage of the contract.

I am, sir, your obedient servant,

The Chief Engineer, Public Works. J. C. TACHE. *D.E.*

PUBLIC WORKS DEPT., OTTAWA, March 15, 1909.

SIR,—In relation to application No. 1161 for $3,137.50 in favour of Mr. Thos. P. Charleson, for extra work on 'Escoumains wharf extension,' as requested by your letter of February 1, I submit herewith some further information received from the engineer in charge and his assistant, showing the details of the calculation of the 27,500 extra cubic feet, and of the 8½c. rate, with sketch plan.

You will notice that Mr. Taché states in his letter, in answer to your request 'for an explanation (if possible) of the manner in which the mistake occurred,' relative to the difference in soundings, that as far as he can ascertain, this was caused 'by the establishment of the gauge.'

In conversation with him some time ago, I gathered that some mistake must have been made in determining the zero of the gauge or low water datum which was used for reduction of soundings during the survey, as compared with that used for construction work.

Of course the assistant engineers are cautioned to be extremely careful in the reduction of their soundings to low water datum, especially in tidal waters, but it must be remembered that the accuracy of a survey has to depend on many human factors. There are the fixing and reading of the gauge, the man holding the sounding chain and calling the depths, the man registering these depths, the man at the instrument fixing their location, the registration of the angles, the reduction in the books, &c., &c., all of which are elements of possible errors, and it is not surprising that sometimes mistakes will occur, as the engineer has to trust to so many hands before he can register depth on plans.

You quote sections 4 and 8 of the specifications to show that the claim cannot be allowed for reasons given, namely, 'scouring' and 'difference in soundings.'

My interpretation of these clauses is that they apply to minor errors or differences of a few inches which almost always exist in such works, and in clause 8 where 'scouring' is mentioned, it refers explicitly to damage which may be caused to the structure or any portion of it, during construction, before acceptance, by either gales, storms, scouring, &c. In the case under consideration, there is no damage to repair or to be made good by the contractor, but several extra feet in height to be built not shown on plans for causes previous to contract work as explained in Mr. Taché's reports.

In clauses 11 and 12 of the same specification, it is provided that 'the value of cost of such additions, deductions, omissions, modifications or alterations shall be

determined in accordance with rates or prices proportionate to the amount of the tender.' And again (in 12) 'Alterations, deductions, omissions, modifications or deviations are to be understood as applying to decided variations in the plan or design, such as a decrease in width, an increase in depth, * * * * the addition of works neither shown nor described, &c., and for these or similar matters alone, will any sum be allowed to the contractor, or deducted from the contract, and then only upon the written orders of the chief engineer. All other alterations, &c., consequent upon a better disposal of materials and improved mode of construction adopted, repairs required, and such like, as long as the costliness of materials, workmanship, &c., are of a trifling nature, which shall be judged by the chief engineer shall be deemed to be included in the contract * * * * .'

Though under the circumstances governing this case, there was probably no direct written instructions, from the chief engineer, to build this extra height, it had to be constructed necessarily to reach the elevation intended and shown on plan, and the chief engineer has recognized this by recommending that the extra amount be paid.

If you refer to page 6 of the specifications, you will find that under the heading 'General Conditions,' it is stipulated that ' * * * on all questions of dispute with regard to the work or materials, or as to meaning or intention of the contract, the drawings and this specification, the decision of the chief engineer shall be final.'

The department has taken great care in investigating this matter, and in fixing the amounts to be allowed.

In the matter of the $800 for rock blasting in the approach, the contractor's claim has been reduced by half, and though it was not ordered by the engineer, he, however, reports that the work was necessary to meet the requirements of the traffic.

Though the contractor is evidently at fault in blasting the rock unauthorized, and cannot complain in case of non-payment, it is considered that the department would have been obliged to have this work done probably at a higher cost, and is therefore receiving full value for the amount recommended.

Hoping that these explanations will be satisfactory.

I am, sir, your obedient servant,

The Auditor General. A. ST. LAURENT, *Asst. D.M.*

AUDIT OFFICE, OTTAWA, March 25, 1909.

SIR,—Let me acknowledge receipt of your letter of March 15, 1909, inclosing Engineer Taché's report of March 9 on the subject of Mr. Thos. P. Charleson's claim for extra work at Escoumains wharf.

The details of the claim are as follows:—

Extra depth: 27,500 cu. ft. of cribwork at 8½c.	$2,337 50
Removal of rock: 800 cu. yds. at $1.	800 00

Error in Soundings for Pier-Extension.

Mr. Taché explains that the soundings, required for preparation of the pier-extension plan, were taken by his assistant Mr. Grenon, who is not now in the employment of the government. Mr. Grenon recorded 5 feet less depth than now exists, at the outer end; and 6 feet less than now exists at the inner end, or junction with the old work.

The tender-plans and contract-plans were based on the shallower and incorrect soundings, and if the wharf-surface would have been from 5 to 6 feet too low, if specification-dimensions had been followed.

The increased quantity of cribwork required is 5½ x 25 x 200, or 27,500 cubic feet, as claimed above.

The Error might have been detected.

The plan of May, 1904, on which the original pier was built, shows 13 feet of water at the outer end of that pier. The extension-plan of August, 1906, (based on Mr. Grenon's soundings) shows 7½ feet of water at the same place. The difference could have been noticed and investigated by the surveying staff in 1906, if the two plans had been compared by them—a precaution which seems ordinary and natural.

Chance of similar errors should be eliminated.

Since the extra work has been actually performed, payment will not be withheld on account of the incorrect plans; though an Order in Council will be necessary to recognize the large increase in the quantities.

But we would like to be informed of any modification of the present system, which may be caused by the department's attention being called to the serious results of poor preliminary surveying.

It will perhaps be thought worth while to duplicate and verify all future observations, by rotating the staff's duties on a succeeding day.

If cognate information is on fyle in other departments such as the Marine and Fisheries, any figures of interest to the Public Works might be copied for the records of the latter department.

Rock-Excavation not ordered by the Resident Engineer.

It is explained that the previous contractor, Mr. Bernier, left too steep an approach to the old wharf; and that Mr. Charleson on his own responsibility, without instructions from the Resident Engineer blasted out 800 cubic yards of granite to make the approach easier,—and took his chances on being paid therefor.

Our unusual difficulty has been that the engineer gave orders orally, instead of in writing; and an Order in Council has always been required, to validate such oral orders. The absence of orders of any kind is however a more serious affair; and the circumstances should be reported very fully to council, if it is concluded to maintain the claim.

Price of $1 a yard, allowed by Department.

In the correspondence now at hand, this price is first mentioned in Mr. Taché's report of November 11, 1908, as having been fixed by his assistant, Mr. A. O. Beauchemin; and it is also carried into the vouchers certified by Messrs. Taché & Lafleur. The only references, however, are to the difficulty and usefulness of the work; there is nothing to show any knowledge by the department of the fact elicited from Mr. Taché in his report of March 9, 1909, that 'The rock was used in the cribwork.' Would this call for a further reduction in the price?

I am sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

ARTHUR ST. LAURENT, Esq.,
Assistant Deputy Minister, Public Works.

PUBLIC WORKS DEPT., OTTAWA, April 14, 1909.

SIR,—Regarding Mr. Thos. P. Charleson's claim for extra work at Escoumains wharf, I beg to acknowledge receipt of your letter of the 25th ultimo, in which you state that payment will not be withheld on account of the mistake made in the contract plans, but that an order in council will be necessary.

A recommendation to council has therefore been prepared, and you will be advised as soon as approved.

In order to minimize the chances of errors in preparing contract plans, the chief engineer has been instructed to caution the district engineers to be extremely careful in this regard, and to always have the site selected for a proposed structure run over a second time, in order to check all figures in the field, before completing construction plans. Of course this will not eliminate all chances of extras for increased quantities, as in some situations the bottom might be scoured by the action of currents or storms between the time contract plans are prepared and the commencement of work, but it is confidently expected that chances of mistakes will be reduced to a minimum.

Price of $1 a yard allowed by Department.

In regard to the $800 allowed for removal of rock from the approach, you ask if this item should not be further reduced, in view of the fact that the contractor used this rock for filling cribwork.

The reduction from $2 per yard claimed, to $1 was done mainly on that account, This was for granite rock, and for a small quantity, of limited thickness. Prices on the Transcontinental Railway for rock blasting in much larger quantities have run generally from $1.50 to $1.70.

As it would have been necessary to have this work performed by the department, in order to complete the approach, at, without doubt, a higher cost, it has been thought equitable under the circumstances to allow $1 per cubic yard.

I am, sir, your obedient servant,

The Auditor General. A. ST. LAURENT, *Asst. D.M. P.W.*

ORDER IN COUNCIL, APRIL 20, 1909.

On a memorandum, dated April 16, 1909, from the Minister of Public Works, stating that under authority of an order in council, dated November 8, 1906, a contract was awarded to Mr. T. P. Charleson for the construction of an extension to the public wharf at Les Escoumains, P.Q., for the sum of $12,445.

That the work was completed in the month of September, 1908, to the satisfaction of the Department of Public Works and the final estimates thereon duly paid.

That subsequently Mr. Charleson presented a claim amounting to $5,000 for work performed in connection with the said extension in addition to that specified in the contract, as follows:—

Increased height of extension, eight feet, containing 40,000 cubic feet at 8½ cents per cubic foot, the pro rata contract price	$3,400
Stone excavation to complete approach to wharf, 800 yards at $2 per yard	1,600
	$5,000

The minister observes that the local resident engineer has examined into this claim and reports, as to the first item, that the increased height of excavation was rendered necessary on account of increased depth of water found when the work was under construction as compared with depths shown on survey plan, due partly to an error made in the reductions of soundings, also possibly to the shifting of material in bottom by heavy storms, and the engineer is of opinion that the contractor has just grounds for a claim in this connection. The quantity of such additional work,

however, he has found, after careful measurement, to be only 27,500 cubic feet, instead of 40,000, reducing the amount of the claim, under this head, to $2,337.50. At this figure, the resident engineer considers the claim fair and reasonable and recommends that it be allowed. As to the item for rock excavation, the resident engineer reports that the work was duly performed, but without his instructions. He adds, however, that although not then authorized, this rock excavation was necessary work in order to provide a suitable approach to the wharf. As this blasted rock was used for filling part of the crib structure, he considers that $800 ($1 per yard) would be a fair and reasonable price for the work instead of $2 per yard claimed, and, in view of the fact that the Department of Public Works would have been obliged, eventually to have the work done at, without a doubt, a higher cost, he recommends that this amount also be allowed.

That the chief engineer of public works concurs in the report of the resident engineer and advises settlement of the claim at the reduced total amount of $3,137.50.

The minister, in the circumstances, recommends that authority be given to pay to Mr. T. P. Charleson the said sum of $3,137.50 in full settlement of his claim for extra work in connection with the contract for the construction of an extension to the public wharf at Les Escoumains, P.Q.

The committee submit the same for approval.

F. K. BENNETTS, *Asst. C.P.C.*

NOTE BY *A.G.*—$3,137.50 was paid to Mr. Charleson on April 27, 1909.

Vaudreuil. Over-casting: Dominion Dredging Co.

AUDIT OFFICE, OTTAWA, April 9, 1909.

SIR,—I beg to acknowledge receipt of application No. 943 for $3,955.68 in favour of the Dominion Dredging Company, Ltd., being for dredging done at Vaudreuil, Que., during August and September, 1907.

Payment is asked for two items of 'material cast over' (6,000 cubic yards in August and 2,100 cubic yards in September). In each case the following explanation is given by the inspector under the heading 'Remarks': 'Capacity of scows, 126 cubic yards. The last lines are of casting over; distance advanced is very short, because we had to cast over and over again same stuff.'

The contract states that 'the contractor shall deposit the mud and materials so dredged out at such place or places as may be indicated by the officer in charge of the works.' The inspector should see that the material dredged is so placed as to make it impossible for it to slip back into the dredged channel. Unless it be to the advantage of the department to have the material cast over, it might be towed away to a reasonably distant dumping ground. In the cases in question, according to the inspector's remarks, it would seem that the easier way to get rid of the refuse would have been to tow it away.

Further, as regards the measurement of material cast over, what method is used to determine the amount. If it is determined by measurement *in situ*, then we have the following calculation:—In the first case (6,000 cubic yards) the width of channel is 30 feet, depth 6 feet, an aggregate of distances advanced per day 150 feet. Allowing one-to-one slopes, we have equivalent to this a rectangular channel 36 feet by 6 feet by 150 feet, or 1,200 cubic yards. In the second case (2,100 cubic yards), we have width of channel 30 feet, depth 6 feet, aggregate of distances advanced per day, 50 feet. Allowing one-to-one slope as before, we get as equivalent a channel 36 feet by 6 feet by 50 feet, or 400 cubic yards. That is, in eac hcase the material has been dredged and re-dredged at least *five* times.

Two other methods might suggest themselves, by counting the number of bucket-loads, and by considering the amount dredged and placed on the scow during the same time. The first method is open to error, as material could not be prevented from sticking to the dipper. The second does not seem to have been followed in this case, as the greatest amount given for dredging, scow measurement, during August, for 12 hours' work, has been 756 cubic yards, while the amount returned for casting over is at the rate of 100 cubic yards per hour.

I would like to know what method the inspector used to determine the amount cast over and why it was necessary in the interests of the department to 'cast over again and again the same stuff.'

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

Resident Engineer's Office, Montreal, April 23, 1908.

Sir,—In answer to your letter No. 1896 of the 14th inst., inclosing therewith a memorandum from the acting deputy minister, to which is attached a letter from the Auditor General asking for information regarding dredging done at Vaudreuil, Que., during August and September last, and asking to let you have a report on the subject:

I beg to inform you that after looking carefully over the Auditor General's letter, the points raised are the following: What method the inspector used to determine the amount of cast over, and why it was necessary in the interests of the department 'to cast over again and again the same stuff'?

I have consulted the inspector on the subject, and he informs me that he has allowed for cast over the same amount as scowed away per hour in the same material.

I notice in the weekly reports of September 3 to 6, they have scowed away 1,260 cubic yards by 12 hours' work, and September 2, 756 cubic yards for 12 hours, which shows that the dredge did not work regularly. I suppose it might be delayed by removal of boulders or harder materials.

The Auditor remarks that the method by considering the amount dredged and placed on the scow during the same time does not seem to have been followed in this case, as he says: 'The greatest amount given for dredging, scow measurment, for 12 hours' work, has been 756 cubic yards, while the amount returned for casting over is at the rate of 100 cubic yards per hour.'

As I said above, the inspector has taken for base the dredging scowed away immediately before the casting over which was likely the same material. He might have taken the mean amount scowed away per hour and allowed the casting over accordingly, but he seems to have taken the maximum scowed away for allowance of casting over.

As to the said point raised by the Auditor General: 'It would seem that the easier way to get rid of the refuse would have been to tow it away,' I would say that, at the time the dredging was performed, the water was so shallow (2 or 3 feet) that it was impossible to float a scow alongside the dredge to take the refuse; thence the absolute necessity of casting over for the first cut, after a few days' work, seeing that the material cast over slipped into the cut and had to be removed again and again, the work was stopped to be continued during high water to permit the scowing away.

I am, sir, your obedient servant,

The Chief Engineer, Public Works. J. Ls. MICHAUD, *Res. Eng.*

CHIEF ENGINEER'S OFFICE, OTTAWA, May 6, 1908.

SIR,—With reference to your memorandum of April 11 last, regarding the accompanying letter from the Auditor General respecting an application for $3,955.68 in favour of the Dominion Dredging Co., Ltd., for dredging done at Vaudreuil during the months of August and September, 1907, I have the honour to transmit herewith a report from Mr. J. L. Michaud, resident engineer, in charge of that dredging, giving the explanations required by the Auditor, in which explanations I fully concur.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. EUGENE D. LAFLEUR. *C.E.*

AUDIT OFFICE, OTTAWA, June 2, 1908.

SIR,—Let me acknowledge receipt of your letter of the 15th ultimo regarding the work of the Dominion Dredging Co. at Vaudreuil, Que.

Mr. Michaud states that 'the inspector had taken for base the dredging scowed away immediately before the casting over which was likely the same material.' From August 5 to 26, the best day's dredging was 756 cu. yds., yet the inspector allowed for overcasting from August 27 to 31 at 1,200 cu. yds. per day. According to the engineer's statement the amount allowed should be 3,780 cu. yds., a decrease in the account of 2,220 cu. yds. (6,000—3,780).

The contract states that payment will be made for material dredged out and deposited at such place or places as the officer in charge may indicate. The place meant is evidently the place of final deposit, and not a temporary one used for the personal convenience of the contractor.

According to the engineer's statement 'the material cast over slipped back into the cut and had to be dredged again and again.' It does not seem clear that payment should be made for the removal of material which still remained in the channel, or for the removal of the same material more than once.

The condition of affairs, the shallowness of the river, &c., should have been foreseen by the contractors, and considered in their tender.

It might be well to state whether the inspector had the engineer's sanction in permitting the dredge to go into a place where it was impossible to do proper dredging, or whether any special agreement was made with the contractor regarding this class of work.

The application is returned herewith. Please divide it into two: one for $972 to cover the overcasting account; and one for $2,983.68.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

RESIDENT ENGINEER'S OFFICE, MONTREAL, January 21, 1909.

SIR,—In compliance with your letter No. 3878 of July 15 last, inclosing therein file No. 319062 in which the Auditor General refers to the dredging done by the Dominion Dredging Co., at Vaudreuil, Que., in 1907, and to my report on the matter dated April 28, 1908, file No. 318149, and asks for further information regarding the material cast over, and asking me to give you full information regarding the point raised by the Auditor General.

I have the honour to report as follows:—

The point raised by the Auditor General is the following:

'It might be well to state whether the inspector had the engineers sanction in permitting the dredge to go into a place where it was impossible to do proper dredg-

ing, or whether any special agreement was made with the contractor regarding this class of work.'

The line of the channel to be dredged was given to the inspector by the engineer with the instruction to follow it. From the beginning of the work until August 22, the depth of water permitted to scow away the material dredged, but then, nearing the shore, and owing to the receding of the water, it became impossible to float dumping scows alongside the dredge. The inspector informed me of that fact, and I ordered the material to be cast over to one side of the cut, where it was supposed to remain, in order to complete the dredging that season.

After a few days of such casting over, the inspector informed me that the material was partly dropping into the cut. I then ordered the dredge to be removed to another part of the channel.

Re the second point raised by the Auditor General:

'I am not aware there was any special agreement with the contractor regarding this class of work, that is to say, casting over.'

As to the quantity of 100 cubic yards of casting over per hour, to which the Auditor General seems to object, after consultation with the inspector, he informs me that he has allowed that quantity of cast over basing himself on the quantity scowed away during the first days of September which was 1,260 c. y. per 12 hours, and which he says was the same material. Even taking for base the quantity of yards scowed away during August, namely: 756 c. y., the allowance of 100 c. y. per hour is not exaggerated as in casting over the dredge works regularly and without interruption, which is not the same when the material is scowed away, there is considerable time lost in turning over the scow end for end to fill the two pockets and replacing the filled and emptied scows.

But I think it might be fair to the department and contractor to deduct of the amount of cast over, 20 or 25 per cent, as it costs less and the dredge does more in casting over than scowing away.

I am sir, your obedient servant,

The Chief Engineer, Public Works. J. LS. MICHAUD, R.E.

Audit Office, Ottawa, February 17, 1909.

Sir,—Let me acknowledge receipt of your letter of January 28, 1909, submitting some further information regarding the overcasting at Vaudreuil in August and September, 1907.

In an inclosure the engineer-in-charge, Mr. Michaud, assumes all responsibility for the ordering of the overcasting from August 27 to August 31. No authority is offered for the overcasting done on September 6 and September 7, nor is it stated whether it was the intention to scow away the overcast material subsequently, or not.

Before tendering for this work the contractor had the opportunity to examine the plans, visit the site of the works and make all inquiries relative to the kinds of material to be removed. His price would, therefore, be sufficiently large to cover all apparent difficulties that might arise. If the intention at the beginning was to remove all the material by scows, then no payment should be made at all for the material cast over, since the overcasting was but one step in the removal of the material. If the purpose was to leave the material in the place in which it was cast over, then payment should only be made for the material removed, which did not slip back into the channel.

The method by which the amount cast over was determined seems to be unfair to he government. In a previous letter, it was shown that if the inspector's figures be taken as correct (allowing a one-to-one slope on each daily channel) the material dredged *in situ* would be, August 26-31, 1,200 cu. yds, and September 6 and 7, 400

cu. yds. Placing the expansion factor for scow-measurement of clay and sand at 50 per cent (Mr. Merrick in correspondence *re* dredging done at Rainy river by Lyons & White, gives 25 per cent for sand and 40 per cent for clay), the actual amount overcast, scow-measurement, would be 2,400 cu. yds. instead of 8,100 cu. yds., as returned.

If the material remained cast over and was not scowed away, then payment should not be asked for more than 2,400 cu. yds.

I am sir, your obedient servant,

The Deputy Minister. FREDERICK HAYTER, *for A.G.*

RESIDENT ENGINEER'S OFFICE, MONTREAL, April 20, 1909.

SIR,—In obedience to your letter No. 8401 of February 25 last, inclosing therein four departmental files regarding the overcasting performed by the Dominion Dredging Co. at Vaudreuil, Que., in August and September, 1907, calling my attention to the Auditor Generals letter No. 329,389, asking for further information regarding the overcasting, and asking me to let you have a further report giving the information asked for.

The Auditor General in his letter dated February 17, 1909, says:

'In an inclosure, the engineer-in-charge, Mr. Michaud, assumes all responsibility for the ordering of the overcasting from August 27 to August 31. No authority is offered for the overcasting done in September 6 and 7, nor is it stated whether it was the intention to scow away the overcast material subsequently or not.'

Those two days of overcasting were done without my knowledge. I have discussed the matter at length with the inspector who explains that the overcasting was done to get through a small ridge of a length of about 50 or 60 feet, on which there was only about 2 feet of water, and beyond that ridge, there was water enough to float the scows; thence, the necessity to cast over in order to continue the dredging beyond.

It was the intention to cast over and leave the material there, but it being soft clay, part of it slipped into the cut during the process. He says he has allowed the same amount of cubic yards as if the material had been scowed away or remained cast over, when in fact the number of cubic yards in *situ* is much less.

However, as part of the material remained castover and was not scowed away, I believe a fair average would be to allow the contractor 4,000 cu. yds with a reduction of 20 per cent on the contract price.

I am, sir, your obedient servant,

The Chief Engineer, Public Works. J. LS. MICHAUD, *R.E.*

AUDIT OFFICE, OTTAWA, October 21, 1909.

SIR,—I beg to acknowledge receipt of your letter No. 180115 in further discussion of the overcasting done by the Dominion Dredging Co., at Vaudreuil, in August and September, 1907, stating that 'As part of the material remained cast over and was not scowed away, a fair average would be to allow the contractor 4,000 cu. yds.'

There still remains the possibility that some of this overcast material was afterwards scowed away and paid for at the full price of 18 cents. In that case a deduction of such an amount should be made from the allowance for overcasting.

If, however, it be shown that of the amounts returned as overcast on the dates in question, August 27-31, September 6-7, none was subsequently scowed away, then the allowance of 4,000 cu. yds. at the usual price for overcast, two-thirds of the contract price (in this case, 12 cents) is a fairly liberal one to the con-

tractors, and though in excess of the amount (2,400 cu. yds.) shown in a previous letter, owing to the difficulties which would be experienced in an attempt to verify the measurements furnished by the inspector (on which this calculation was based), it will be considered as satisfactory by this office. An application for $480 (4,000 cu. yds. at 12c.) will be readily certified.

I am, sir, your obedient servant,

The Deputy Minister, Public Works, FREDERICK HAYTER, *for A.G.*

Kaministiquia and Mission Rivers: Three Feet more Depth.

AUDIT OFFICE, OTTAWA, August 12, 1909.

SIR,—In connection with the dredging done by the Great Lakes Dredging Co. at Port Arthur and Fort William, under contract No. 5992, an agreement was made (No. 7339), whereby the company were to increase the depth of the dredging from 22 ft. to 25 ft.. on the following terms: over all areas already dredged, at the rate of $2.85 per cu. yd, scow-measurement, for rock and 22½ cts. per cu. yd. for all other material; for the uncompleted areas, $2.40 per cu. yd. scow-measurement, for, rock, and 10¼c. per cu. yd., scow-measurement, for all other material.

It would seem that the rate of 10¼ cents was only for the additional 3 ft., they having already agreed to dredge to a depth of 22 ft. at the rate of 9 cents per cu. yd.

In the accounts rendered for June, 1909, the following quantities were shown as dredged under the various contracts: No. 5992, 68,581 cu. yds.; No. 7170, 146,288 cu. yds.; No. 7339, on completed areas, 69,738 cu. yds., on uncompleted areas, 223,178 cu. yds.

From the large amount returned as dredged under contract No. 7339 on uncompleted areas it might be inferred that payments are being made under this heading which should properly come under contract No. 5992. In order to obtain an amount of 223,178 cu. yds. in a 3 ft. depth, a larger area would have to be dredged than would seem possible by comparison with the amount returned under contract No. 5992.

It would be well to have this matter investigated and to instruct the engineer to have the accounts returned under their proper headings.

I am, sir, your obedient servant,

The Asst. Dep. Minister, Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, August 13, 1909

SIR,—I beg to acknowledge receipt of your letter of the 12th instant, regarding the different contract prices for dredging at Fort William and the possibility of returning some of the dredging under a heading which should come under another contract.

You state, 'It would seem that the rate of 10¼c. was only for the additional three feet, they having already agreed to dredge to a depth of 22 ft., at a rate of 9c. per cubic yard,; and further you add: 'From the large amount returned as dredged under contract No. 7339 on uncompleted areas it might be inferred that payments are being made under this heading which should properly come under contract No. 5992. In order to obtain an amount of 223,178 cub. yds. in a three foot depth, a larger area would have to be dredged than would seem possible by comparison with the amount returned under contract No. 5992.'

I might explain that, in considering the dredging to a depth of 25 feet, a distinction had to be made between these areas which had already been dredged to a depth of 22 feet, or practically so, and the areas which had not yet been touched.

In the first case, we have dredging of an additional three feet which is practically 'skimming,' and the bid for this was 22½ cents per cubic yard.

In the second case, *that of untouched areas*, or parts not already dredged, it is true that we had a price already of 9 cents for the dredging to a 22 foot depth, and 22½ cents for the additional 3 feet, but it was considered that it would be in the interest of the department to agree with the contractors on an average price for the full depth of 25 feet. It was found that by offering the contractors 10¼ cents for these untouched areas, which would include the three feet additional, a saving would be made for the department as compared with the method of paying first, 9 cents down to 22 feet, and 22½ cents for the three feet additional.

I think you will find that this whole matter, as well as the methods of arriving at an average, are explained fully in a memorandum which I made to the Honourable the Minister in April, 1909, copy of which is herewith attached for your information, with such notes as are necessary to make it up to date.

Accompanying this memo, is a plan showing improvements in the Mission and Kaministiquia rivers which I could not send you the other day on account of having no copies available at the time.

If there is anything in the memorandum and the plan which is not clear, I will be glad to give personal explanations at any time you so desire.

I am, sir, your obedient servant,

FREDERICK HAYTER, Esq., Audit Office. A. ST. LAURENT, *Asst. D.M.*

FORT WILLIAM HARBOUR IMPROVEMENTS: MEMORANDUM FOR MINISTER.

Brief Review of Improvements to Date.

PUBLIC WORKS DEPT., OTTAWA, April 13, 1909.

Prior to 1906, dredging was limited practically to a part of the Kaministiquia river, improving the narrow and tortuous channel where most required.

In 1906, however, on account of the demands of traffic and the ever increasing size of lake freighters, and also with a view to give effect to the recommendation of the Transportation Commission, a definite scheme of improvements was prepared for both the Kaministiquia and Mission rivers, which provided for the uniform widening, straightening and deepening of channels from the lake up to beyond West Fort William, a distance of five miles.

A contract was let to the Great Lakes Dredging Company, which involved the removal of about 9,000,000 cubic yards of material, scow measurement, giving a depth of 22 feet of water and a minimum width of 300 feet.

The areas covered by this contract are shown by a green tint on accompanying plan, (with exception of G.T.P. terminal basin.)

The contract for loose material is 9 cents per cubic yard, scow measurement, with one cent additional per mile for extra haul over a limit of 3½ miles to the dumping ground.

The amount of material yet to be removed under this contract is 1,266,155 cubic yards for the Kaministiquia river, and 2,856,861 cubic yards for the Mission river, a total of 4,123,016 cubic yards.

Most of this yardage is over areas already dredged, where the full depth of 22 feet has not yet been made. Untouched areas under the contract are shown hatched

green on the accompanying plan and amount to 1,827,932 cubic yards, included in the quantity of 2,856,861 cubic yards given above for the Mission river remaining yet to be dredged.

Enlarged Scheme of Improvements.

The enormous growth in traffic and in the size and draft of vessels within the last two or three years has made it a necessity to provide channels in the harbour, at least 500 feet in width and 25 feet in depth. This was set forth in a recommendation to council, which was approved November 21, 1908, and authority was granted by order in council to purchase the land required for the proposed widening.

This scheme of enlargement is shown tinted red on plan herewith. It involves:—

1. The deepening of all the areas covered by the contract of 1906, to a depth of 25 feet, instead of 22 feet, or the removal of an additional quantity of 1,151,666 cubic yards, scow measurement, for the Kaministiquia river, and 770,305 cubic yards, scow measurement, for the Mission river, or a total of 1,921,971 cubic yards, scow measurement for both. For the removal of this additional three feet tenders have been received, the lowest of which is 22½c. per cubic yard.

2. The widening at points tinted red on plan, to a depth of 25 feet, which provides for full width of 500 feet and for the purchase of which land, provision has been made by order in council, passed November 21, 1908.

This will require the removal of 6,319,417 cubic yards scow measurement for the Kaministiquia river, and 2,197,332 cubic yards scow measurement for the Mission river, or a total of 8,516,749 cubic yards, scow measurement. (Since the writing of this memorandum an order in council was passed May 19, 1909, granting authority to enter into a contract for this deepening and widening, contract No. 7339).

Terminal Basin, Grand Trunk Pacific Railway.

The scheme in relation to this terminal is shown hatched green on accompanying plan.

This project involves the removal of 5,608,291 cubic yards, scow measurement, to a depth of 25 feet, including excavation for crib seats.

Tenders were called for this dredging in October, 1908, and by order in council passed February 16, 1909, the lowest price submitted, viz., 16c. per cubic yard, scow measurement, was accepted and the contract was awarded to the Great Lakes Dredging Co. (Contract No. 7170).

Wharfage.

This terminal involves also the construction of 20,478 lineal feet of wharfage.

The project was approved by order in council passed March 16, 1909, by which authority was granted to proceed at once with the construction of about 5,000 lineal feet of quay walls which will provide for immediate requirements and which will cost approximately $350,000.

(NOTE.—Gordon & Mason, contract for lumber, contract No. 7306, approximately $119,782.30. Smith & Heney, lowest tenderers, contract not signed yet, approximately $222,675.35).

An agreement has been reached with the company by which that portion of land on which the quay walls will stand, shall be conveyed to the Crown free of charge.

Approximate Estimates of Cost—Dredging—Quantities and Prices.

(1) Amount yet to be done under contract passed in 1906, below zero level (green tint): Approximate cubic yards, Kaministiquia river, (scow measurement), 1,266,155, Mission river, scow measurement, 2,856,861; total, 4,123,016 at 9c.=$371,071.44; (2) Deepening areas of 1906, contract to 25 feet (3 feet additional), (green

tint), Kaministiquia river scow measurements, 1,151,666 cubic yards; Mission river, 770,305; total 1,921,971 at 22½c=$432,443.47.

Out of the item of 2,856,861 cubic yards, a quantity of 1,827,932 cubic yards represents areas yet untouched of 1906 contract to a depth of 22 feet. The extra three feet under these areas represent 281,417 cubic yards, making a grand total of 2,109,349 cubic yards. In calculating the prices applying to these two items, viz., 9c. for the first and 22½c. for the three feet additional, gives an average price of 10·9c. per cubic yard. These areas not having been dredged over as yet, I would deem 10¼c. a fair and reasonable price, for deepening at once to a depth of 25 feet. As compared with rate of 9 and 22½c.; this would mean a saving of $13,710.

Widening Rivers to 500 feet and with a depth of 25 feet.

Kaministiquia river, cubic yards, 6,319,417; Mission river, 2,197,332; total, 8,516,749 at 10·6c.=$902,775.39.

Out of the item 6,319,417 cubic yards, for the Kaministiquia river, 5,561,086 cubic yards represents amount to 22-foot line and 758,331 cubic yards the extra 3 feet for 25-foot depth.

Applying same prices as before, namely, 9c. and 22½c. gives an average price of 10·6c. per cubic yard.

Out of the item of 2,197,332 cubic yards for Mission river, 1,933,652 cubic yards represents amount to 22-foot line and 263,680 cubic yards the extra 3 feet for 25-foot depth; applying same prices as before gives an average price of 10·6c. per cubic yard.

This widening is not covered by any special call for tenders, but is naturally an extension of work included under the contract of 1906.

For the same reasons given above, a fair and reasonable price to do the dredging at once to 25 feet would be 10¼c.; thus effecting a saving of $39,808.63 as compared with rates of 9 and 22½ cents for respective depths of 22 and 25 feet.

(NOTE.—Since writing this, as this work of enlargement could not be well separated from the first contract, and given to other contractors, the Great Lakes Dredging Co. have agreed to perform the work of widening to a depth of 25 feet at rate of 10¼c. Order in council passed May 19, 1909. Contract signed June 4, 1909. No. 7339).

Dredging Terminal Basin to a depth of 25 feet.

G.T.P. Terminal Basin, 5,608,291 at 16c.=$897,326.56. Contract for this work was awarded to the Great Lakes Dredging Co., the lowest tenderers, at the rate of 16c. per cubic yard for deepening to a depth of 25 feet. Order in council passed February 16, 1909.

Terminal Basin:. Dredging and Construction Work.· Revised Estimate.

Dredging to 25-foot depth, 5,608,291 at 16c..	$ 897,326 56
Quay walls, total under project, hatched green on plan, lineal feet, 20,478 at $70..	1,433,460 00
Total for basin..	$2,330,786 56

It is calculated that about 15,000 lineal feet of this wharfage will be all that will be required within the next six years. Authority has been granted for calling for tenders for the immediate construction of about 5,000 lineal feet of this work at an estimated cost of $350,000.

Summary of Estimated Total Cost.

Assuming that average prices as above deducted from the rates of 9 and 22½ cents will apply, the total cost may be estimated as follows:—

Dredging (estimated cost) 20,170,027 cubic yards....	$2,603,616 86
Quay walls, 20,478 lineal feet..	1,433,460 00
	$4,037,076 86
Plus for purchase of land, say..	150,000 00
Plus for probable extra haulage over 3½ mile limit..	500,000 00
Grand total..	$4,687,076 86

It is estimated that the whole of these improvements cannot be completed in less than eight years, involving an expenditure of about $585,000 per year for Fort William alone.

Out of the 20,170,027 cubic yards of dredging remaining to be done to carry out the improvements deemed necessary to meet the requirements, 9,731,307 cubic yards has been authorized and is under contract.

(NOTE.—Since this was written remainder has been placed under contract).

Authority is required now to close and extend contracts for the remaining 10,438,720 cubic yards, for deepening to 25 feet and for widening to 500 feet, the principle of which has already been approved, the cost of this part of the dredging being estimated at $1,335,219, to be completed in about eight years. (See note above).

NOTE.—This revised estimate cancels all former estimates made previously, as this is based on more accurate information.

Respectfully submitted,

A. ST. LAURENT, *Asst. D.M.*

Fort William: Extra haul over 3½ mile limit.

AUDIT OFFICE, OTTAWA, August 5, 1909.

SIR,—I beg to acknowledge receipt of your applications Nos. 201 and 288 for $14,507.93 and $13,235.68 respectively, in favour of the Great Lakes Dredging Company, being for dredging in the Mission river during May and June, 1909.

The accounts accompanying application 201 may be summarized as follows:—

Dredging 89,926 c.y. at 17c., including extra haul..	$15,287 42
Dredging 7,400 c.y. at 11¼c., including extra haul..	832 50
Total..	$16,119 92
Less drawback..	1,611 99
Amount of application..	$14,507 93

At present the Great Lakes Dredging Company have under way two dredging contracts in the Mission river, one of which calls for the removal of ordinary material at 16 cts. per cu. yd. and the other at 9 cts. per cu. yd. The present applications offer no information which would signify the contract that applies.

As has been previously mentioned in correspondence with your department, when a contract directs attention to certain plans, those plans must be certified as essentially part of the contract and copies of them should accompany the contract form sent to

this office. In the present case it will be necessary to have the plans for the work, both under contract No. 7170 and under contract 5992. Any further information which would tend to distinguish the contracts might also be supplied.

With regard to charges for overhaul, one cent per cubic yard additional for every additional mile the scows are ordered to be towed. In the case under discussion the additional distance is one-fifth of a mile, except for 4,346 cu. yds. where the extra towage is one-tenth of a mile. It does not seem a correct interpretation of the contract to allow the price for a full mile when the extra is only a small fraction.

Two methods of dealing with the question might be suggested: first, to allow a full mile when the extra distance exceeds one-half mile and to allow no overhaul when the extra distance is less than one-half mile; second, when the extra towage is for a fraction of a mile to allow in each case the same fraction of a cent per cubic yard. The latter would probably be the more satisfactory method of the two to the contractor, and would be fair to all parties concerned.

I am, sir, your obedient servant,

Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

Dept. of Public Works, Ottawa, October 27, 1909.

Sir,—In further reference to your letter of August 5, last, in which you discuss the question of payment for overhaul in regard to the Great Lakes Dredging Company's contract for dredging in Fort William harbour, I beg to transmit herewith for your information copy of a report from Mr. District Engineer Merrick, and also copy of a ruling made by the Chief Engineer, in this connection, in 1906.

In transmitting a copy of his ruling, the Chief Engineer states that nothing has occurred to cause him to change his ruling since it was made.

I am, sir, your obedient servant,

The Auditor General. A. St. LAURENT, *Asst. D.M.*

Dept of Public Works, Fort William, August 16, 1909.

Sir,—I beg to acknowledge receipt of your letter No. 4055, dated August 9, in which you inclose a letter from Mr. Hayter, to the Deputy Minister, regarding overhaul in connection with the Great Lakes Dredging contracts in this harbour, and offering suggestions relative to allowance of mileage in an overhaul regarding these various contracts.

I beg to report as follows:

Mr. Hayter suggests, first, that no overhaul should be counted under a half mile. This was the view taken of the specifications by Mr. Temple, who was then in charge of the work in 1906, upon the commencement of this contract No. 5992. Objection was taken to Mr. Temple's ruling, in this regard, and the matter was referred to Chief Engineer for ruling thereon.

The Chief Engineer decided that overhaul should count anywhere in the mileage distance exceeding three and a half miles of tow, as this was his intention when he framed the specifications in connection with contract No. 5992. See Chief Engineer's letter No. 43889, dated October 6, 1906. The work has been carried on according to this ruling, which, has been in force since 1906.

Relative to Mr. Hayter's second suggestion, that contractors should only be paid in an overhaul for exactly that portion of a mile which is actually towed, would mean

that the prices in connection with the contracts would be greatly increased in number, as owing to the fact that we have in the Mission and Kaministiquia rivers, a total of eight miles extra haulage, which being subdivided into tenths of miles, would give some eighty different prices in connection with the dredging operations.

You will readily comprehend that the amount of work involved, should this latter suggestion of Mr. Hayter's be carried out, would occupy almost the complete time of the office. However, if the second suggestion of Mr. Hayter's is to be the ruling regarding the overhaul, kindly advise me to that effect, and I will endeavour to carry out the work on this basis.

Trusting this explanation is satisfactory, I herewith return Mr. Hayter's letter to the Deputy Minister.

I am, sir, your obedient servant,

(Sgd.) W. P. MERRICK, *Dist. Eng.*

EUGENE D. LAFLEUR, Esq., C.E.,
Chief Engineer, Ottawa...

OTTAWA, October 6, 1906.

SIR,—Clause 29 of the specification for dredging in the Mission and Kaministiquia rivers reads as follows:—

'Clause 29. The price mentioned in the tender shall include towing a distance not exceeding 3½ miles to the dumping grounds, and the contractors are to accept 1c. per cubic yard additional for every additional mile of towing that may be ordered.'

This clause was intended by me to mean that, should the contractors, during the course of the work, be obliged to tow a distance exceeding 3½ miles, they would be entitled to one cent additional for such additional distance up to 4½ miles. In other words, that within every zone in the mile over and above the 3½ miles specified, the contractors would be entitled to one cent additional per cubic yard. I therefore have to ask you to allow the contractors the one cent additional per cubic yard, for all material deposited at a greater distance than 3½ miles specified from the place of dredging. Should it at any time occur that the distance from the place of dredging to the dumping grounds would in any way exceed 4½ miles, the contractors would then again become entitled to an additional sum of one cent per cubic yard for material so deposited between the 4½ and 5½ miles limit.

I am, sir, your obedient servant,

E. D. LAFLEUR, *Chief Eng.*

E. B. TEMPLE, Esq.,
District Engineer, Port Arthur.

Kaministiquia and Mission Rivers: Proportion of Rock.

AUDIT OFFICE, OTTAWA, Nov. 13, 1908.

SIR,—Let me acknowledge receipt of your application No. 763 for $70,354.07, in favour of the Great Lakes Dredging Co., being for dredging in the Mission and Kaministiquia rivers in September, 1908.

In the accounts for work done by the dredges *No. 8* and *No. 15* apears items of rock dredged, 10,587 cu. yds. and 6,979 cu. yds. respectively.

An examination of the weekly reports of the inspectors shows that the kind of material dredged from September 14-30 has been returned as rock and clay, and a daily statement is added of the amount of rock in the spoil. For example, in the

returns for *No. 8*, September 21 to 26, the following are the estimates of the rock dredged: September 21, 29 p.c. of spoil; September 22, 32 p.c.; September 23, 35 p.c.; September 24, 42 p.c.; September 25, 24 p.c.; September 26, 26 p.c.

Please supply details of the methods employed to arrive at these figures.

In order to avoid unnecessary delay to the contractor Application 763 has been certified on account.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

FORT WILLIAM, Dec. 5, 1908.

SIR,—I beg to acknowledge receipt of your letter No. 6769, dated November 20, inclosing file No. 325643, in which the Auditor General asks method of arriving at percentages of rock, as shown in dredge returns in connection with dredges Nos. 8 and 15. I beg to report as follows:

The capacity in cubic yards of each pocket, in each scow, being known, I instructed the inspectors to measure the amount of rock in each pocket that contained rock, in each scow, and to divide total rock for scow by the number of pockets in the scow, which would give mean average of rock per scow, which would be a percentage of total allowance for scow.

This being carried on for a days work in connection with each scow, and divided by number of scows, would give a mean average per day as shown in returns.

I did this in order to save the double entry for each date of the two classes of material, and was able in consequence to show the rock under its own heading at bottom of dredge return.

I am, sir, your obedient servant,

The Chief Engineer, Ottawa. W. P. MERRICK, R.E.

Temiskaming Storage Dam: Kirby & Stewart.

OFFICE OF THE ASSISTANT DEPUTY MINISTER,
PUBLIC WORKS DEPT., OTTAWA, Jan. 16, 1909.

Memorandum re Storage Dam at Foot of Lake Temiskaming.

Owing to a clerical error in preparing the forms of tender for this work, a bulk tender was called for, while the plans and specifications had been prepared with a view of having the work performed according to unit prices submitted.

This was necessary on account of the impossibility of determining the true profile of the rock formation, underlying the loose material in the bed of the river, which at one point is very deep and too swift to enable reliable test borings to be made.

The plans therefore do not show the actual quantities in excavations and materials which will be required in the foundations, and are open for large claims for extras over and above the bulk sum tendered (as based on plans), and for this reason the system of unit prices was preferred, leaving to the engineer to decide the amount of work necessary to secure proper and safe foundations, as the work progressed.

The bulk sum tenders received are as follows:—

Kirby & Stewart	$ 76,000
E. Conroy & D. E. Conroy	98,000
E. J. Rainboth	115,609
J. Lumsden	265,000

Applying the unit prices submitted by these parties for the different classes of materials, to the approximate quantities supplied by the engineer, the result is as follows:—

Kirby & Stewart	$ 95,500
E. Conroy & D. E. Conroy	116,800
E. J. Rainboth	130,500
J. Lumsden	205,570

It can be seen that Messrs. Kirby & Stewart's unit prices are also the lowest.

In the schedule of prices there is an item for concrete, which was included in the event of it being decided to select that material for the dam.

In my opinion this dam, which is a most important one, should be built of concrete, in order to give it a permanent character, and reduce cost of annual maintenance. Annual repairs on such an extensive dam, if built of timber, would be quite heavy. Moreover mass concrete laid on good foundations will be much safer than crib work, and there would be no difference in time of construction.

The increase in cost on the first outlay would be relatively small, and in the end, as it would require much less repairs, it would be more economical than a timber dam.

A comparative estimate of cost with concrete for the main body of the dam, based on prices submitted by the tenderers and approximate quantities given by the engineer shows again that Messrs. Kirby & Stewart are the lowest.

These give:

Kirby & Stewart	$108,050
E. Conroy & D. E. Conroy	137,500
E. J. Rainboth	145,000
J. Lumsden	165,600

Of course these estimates are only approximate, as mentioned above, on account of the uncertainty of the rock profile.

In the interest of the department, to avoid possible claims and disputes, and for safety and permanence, I strongly recommend that the contract be based on the unit prices submitted by the lowest tenderer, and that the main body of the dam be constructed of concrete

I am, sir, your obedient servant,

A. St. LAURENT, *Asst. D.M.*

The Minister of Public Works.

Order-in-Council, January 18, 1909.

On a memorandum, dated November 28, 1908, from the Minister of Public Works stating that in answer to public advertisement the following tenders have been received for the construction of dam, bulkheads and slide at head of Long Sault rapids, Ottawa river, viz.:—

1. T. Sidney Kirby, R. Gordon Stewart	$ 76,000
2. Edward Conroy, David E. Conroy	98,000
3. Edward J. Rainboth	115,609
4. J. Lumsden	265,953

The minister further states that the lowest tender is accompanied by an accepted bank cheque for $8,000 as a guarantee for the execution of the contract.

That the chief engineer of the Department of Public Works estimates the cost of the work at $80,000.

That parliament, at its last session, voted the sum of $75,000 in connection with the above-mentioned work, leaving a balance of $1,000 unprovided for to which should be added, for superintendence and contingencies, 10 per cent of the contract price, or in all, say $8,600.

The minister, therefore, recommends that authority be given to accept the tender of T. Sydney Kirby and R. Gordon Stewart, Ottawa, at $76,000 for the construction of dam, bulkheads and slide at head of Long Sault rapids, Ottawa river, and that parliament be asked to provide the amount required to carry the work to completion, viz., $8,600.

The committee submit the same for approval.

F. K. BENNETTS, *Asst. C.P.C.*

AUDIT OFFICE, OTTAWA, Jan. 28, 1909.

SIR,—Inclosed please find Mr. St. Laurent's memorandum *re* 'Storage Dam at Foot of Lake Temiskaming,' which you left with me yesterday for consideration of the question whether, in view of the change in plan from Cribwork to Concrete, it might not be necessary to call for new tenders.

The present difficulty is, that a blank item-schedule (intended to be comprehensive and final) was attached in error to a form of bulk-sum tender, and described as 'Prices for extra work.' Prices were named by the tenderers, both for the bulk-sum and for the items; and it is fair to assume that the item-figures are tendered for extra work.

The contract was awarded to Tender 'A,' largely as a result of low prices for Excavation and Timber. Tender 'A' named $8.50 for Concrete, as against $9, $10 and $8 from 'B,' 'C' and 'D.' (Attached please find prices paid for Body Concrete on Ontario Canals, under contract; the localities being of course easier of access).

To get a more permanent structure, it is now proposed to change the plan from Timber to Concrete,—thus eliminating much of the timber, and increasing the Concrete to nearly three-quarters of the work.

If the question of the public interest in speedy completion is not raised, I do not think that the proposed precedent is a safe one to establish, when the Specification has been so radically altered.

Mr. St. Laurent explains in conversation, that one reason for letting the contract at an early date (without further advertising), is to allow the stop-logs and other heavy timber to be prepared and delivered before spring-time, and thus enable the dam to be operative at the end of 1909, instead of at the end of 1910.

This would be accepted by the Audit Office as coming under Chapter 7 of the Statutes of 1905, namely: 'The Minister * * * * shall invite tenders by public advertisement, * * * * except in cases of pressing emergency in which delay would be injurious to the public interest * * * * *.' This Departmental responsibility is not divided with the Audit Office in any way. It is for the government to say whether the advantages of competition are more than offset by the urgency of the special circumstances.

Lower rates might be obtained on the increased quantities—or perhaps higher. The saving of one season may not be worth the price paid for it. More experienced contractors might possibly be induced to compete on an improved specification. The extended time might be of use in elaborating the plans, which are at present incomplete. All these are questions outside of the Audit sphere of control.

It occurs to me that, since Urgency affects the supply of Timber only, and not the Concrete, it might be feasible to separate the Stop-logs and other heavy timber from the rest of the work, and advertise it in a detailed bill for the Lumber Dealers to deliver on the site, cut to size. This part of the work could proceed at once, while plans and tenders are preparing for the Concrete Dam, to be let on a second contract, to builders of experience in that line, who would take the timber as supplied to them, and fit it into their own structure.

For any contracts let under 'Urgency' instead of 'Competition,' the prices will need to be certified 'Fair and just.'

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Order in Council, March 13, 1909.

On a memorandum, dated February 20, 1909, from the Minister of Public Works, stating that an order in council was passed on January 18, 1909, authorizing the acceptance of the tender of Messrs. Kirby & Stewart, the lowest of four received, for the construction of a timber dam, bulkheads and slides at the head of Long Sault Rapids in the Ottawa river, for a bulk sum of $76,000.

The minister observes that action, however, has not been taken on this authorization, it being decided upon further consideration and fuller examination into the matter, that in view of the importance of the work, this being the key dam of the scheme for the conservation of the waters of the upper Ottawa river, it would be preferable to have it constructed of concrete, in order to give it a permanent character and reduce the cost of annual maintenance. Moreover, a great factor in the cost of concrete in the case of dams is the cost of coffer-damming required, which in difficult locations may raise the price of concrete to much higher figures than those given. Coffer-damming will be required at Temiskaming and unforeseen difficulties in unwatering may be encountered.

That the tenders above mentioned, in addition to bulk sum price, give a unit price for each class of material, including cement, and applying these prices to the approximate quantities of material in the work, as determined by the engineer, the amount of the various tenders for the construction of the dam of concrete would be as follows:—

1. Kirby and Stewart,	approximately	$108,050
2. E. & D. E. Conroy	"	137,500
3. E. J. Rainboth	"	145,000
4. J. Lumsden	"	165,000

Messrs. Kirby & Stewart still remaining the lowest tenders on the altered conditions.

That attached is the schedule of itemized prices of Messrs. Kirby & Stewart's tender, which prices are considered fair and reasonable.

The minister in view of the foregoing, recommends that the order in council of January 18, 1909, above mentioned, be annulled and that authority be given, instead, to enter into contract with Messrs. Kirby & Stewart for the construction of a concrete dam, bulkheads and slides at the head of Long Sault rapids, in the Ottawa river, at the unit prices mentioned in the attached schedule, or an approximate total sum of $108,050, and that parliament be asked to provide the further amount required to carry the work to completion.

The Committee submit the same for approval.

F. K. BENNETTS, *Asst. C.P.C.*

SCHEDULE of Prices in Messrs. Kirby & Stewart's tender for construction of dam, bulkheads and slides at head of Long Sault, Ottawa River.

Thessalon: Dredging and Drilling: C. S. Boone Co

AUDIT OFFICE, OTTAWA, May 18, 1908.

SIR,—Let me acknowledge receipt, on May 14, of your application No. 942 for 1907-8, for $5,436.50 in favour of Mr. C. S. Boone, for 'Dredging, drilling, &c., at Thessalon between July and October, 1907,' as follows:—

Dredge *Meade*, working at Thessalon during July and August, 1907: 14 days, 10½ hours per day, at $100 per day, (this includes towing to and from Blind river, 2 trips)	$1,400 00
Drill and tug working at Thessalon from September 11 to October 22, 1906: 36 days at $115; less $10 per day for diver	3,780 00
Dynamite, 550 lbs. at 25c	137 50
Wire, 10 lbs. at 65c	6 50
Caps, 450 at 5c	22 50
	$5,346 50

Attached to the application is a letter dated July 4, 1907, from Mr. Valiquet of the chief engineer's branch, to Engineer J. G. Sing at Toronto, authorizing him to arrange with Mr. Boone for this work at a fair and reasonable price.

* * * * * *

In what manner was compliance had with the statute requiring public competition, with certain specified exceptions?

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, January 22, 1909.

SIR,—With reference to your letter of May 18 last, respecting our application No. 942 for 1907-8 for $5,436.50, in favour of Mr. C. S. Boone, for dredging, drilling, &c., at Thessalon, Ont., I beg to inclose herewith a copy of a report on the subject received from Mr. J. G. Sing, engineer in charge, containing the information desired by you.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

AUDIT OFFICE, OTTAWA, February 2, 1909.

SIR,—I beg to acknowledge receipt of your letter of January 22, 1909, in repl yto one mailed from this office on May 18, 1908, in discussion of the dredging and drilling done by the C. S. Boone Co., at Thessalon, Ont.

* * * * * *

The department has overlooked a question raised in my letter of May 18, 1908, as to what was the manner in which 'compliance was had with the statute requiring public competition, with certain specified exceptions.' Please state the reasons why public competition was not invited.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, August 18, 1909.

SIR,—Mr. Boone called here yesterday in reference to an unsettled account for work at Thessalon in 1906 and 1907.

I do not appear to have had any reply to my letter of February 2, 1909, and therefore am not in a position to pass the account. Mr. Sing in his letter of January 11, 1909, gives as his authority for asking Mr. Boone to proceed with the work, a letter from the chief engineer—No. 2379—dated June 9, 1906. A copy of this letter should be sent me. As the amount involved exceeded $5,000, I will require the authority for departing from the requirements of the statute.

An order in council based on a full report of all the circumstances of the case will have to be obtained before payment can be made. An early reply will much oblige.

Iam, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Sept. 28, 1909.

SIR,—Regarding the above matter, your letters of February 2 and August 18, 1909, in discussion of the drilling and dredging performed and accounts connected therewith have been referred to me for reply.

* * * * * * *

Early in 1906, complaints reached the department that a dangerous rock had been located in Thessalon harbour, and on June 9 of the same year the Chief Engineer wrote to Mr. District Engineer Sing as follows:—

'The honourable the minister is informed that the wharfinger at Thessalon has discovered a rock not far from the government dock at that place. Will you kindly have one of your assistants visit the locality immediately, locate the rock in question, and take such steps as will insure its removal as soon as possible.'

I have reasons to believe, from the above instructions, that it was assumed at the time that the rock mentioned was a loose rock, and that its removal would not entail a large expenditure. The rock, however, proved to be a relatively large rocky shoal, which cost more to remove than expected.

The removal of obstructions in harbours, as soon as discovered, is always an urgent necessity, on account of the possibility of serious damage to vessels, and this explains the prompt action taken, without calling for public tenders. Moreover, the district engineer states that after careful inquiry, it was found that no plant other than Mr. Boone's was available.

It is my opinion, therefore, that the department was justified, and acted in the public interest in proceeding with this work, as an exception under the statute requiring public competition.

* * * * * * *

The drilling and blasting was completed so late in 1906 that it was impossible to then obtain the services of a dredge to remove the material. This was done during 1907 by the dredge *Meade*, which had to be towed from Blind River, where she was working.

After the material had been removed, careful soundings revealed the fact that the full depth required had not been secured everywhere, and this explains the return of the drilling plant for eight days in August, 1907.

I am, sir, your obedient servant,

The Auditor General. A. ST. LAURENT, *Asst. D. M.*

Legal Services: Audit by Justice Department.

ACCOUNTANT'S OFFICE, OTTAWA, May 31, 1909.

SIR,—With reference to the refusal of the Department of Justice to furnish certified duplicates of accounts of agents of that department and to the suggestion made by the Deputy Minister of Justice in his letter of April 1 (Ref. 331926), I have discussed this matter with the chief clerk in charge of Public Works accounts in the Audit Office, and am informed that while in the majority of cases they have no further use for vouchers after the close of the session of parliament following the date of payment, they cannot engage to return any specific voucher or class of vouchers to this office, for two reasons, viz.:—

1. It frequently occurs that vouchers are mislaid in the handling involved by discussion in parliamentary committee, and are not returned to the Audit Office.

2. This office annually furnishes about 50,000 vouchers to the Audit Office. In the preparation of the Auditor General's Report and other work of that office these are subjected to several handlings and re-classifications, in the course of which the system of numbers placed upon them in this office is necessarily disregarded. Out of these 50,000 the payments to agents of the Minister of Justice would number from 100 to 200, and the chief clerk of the Audit Office in charge of this work informs me that the labour involved in tracing up each of these among so great a mass would be more than his office could undertake. It would certainly be many times greater than that required for the supply of certified duplicates in the first instance.

I am aware that some of the departments do not see fit to preserve a file of vouchers. Their work is probably of a very different nature from that of this department. The experience of many years has shown that it would be utterly impossible to carry on the business of the Department of Public Works without a complete set of vouchers justifying and explaining all expenditures.

I may add, that although this department does business not only with the other departments of the government, but with all the great financial and commercial institutions, this is the first instance in which it has been refused vouchers in duplicate.

I am, sir, your obedient servant,

The Deputy Minister, P.W.D. A. G. KINGSTON, *Accountant.*

PUBLIC WORKS DEPT., June 5, 1909.

SIR,—You will remember my speaking to you regarding the request of the Deputy Minister of Justice being dispensed from signing, in duplicate, vouchers for agents' fees, &c., and suggesting that we arrange to have the Audit Office vouchers returned to us and kept on our file. To this you had no objection. Mr. Kingston seems to have been discussing the matter with one of your officers, but it strikes me that the objections raised are not at all unsurmountable.

As to the first one, under the new system, of vouchers and papers being taken to the Public Accounts Committee, when sitting, in the charge of an officer of the department to which they belong, and returned by him to the department at the close of the sitting, I cannot see that there should be any possibility of papers going astray.

As to the second objection, would it not be possible, the payments to the agents of the Department of Justice being so few, to have these papers placed in a separate docket as they are handled? This would obviate the necessity of searching through some 50,000 vouchers, as stated.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D. M*

AUDIT OFFICE, OTTAWA, July 6, 1909.

SIR,—With reference to the difference between the Justice Department and yourself, concerning the certifying of duplicate vouchers:

I understand that Mr. Newcombe's objection is against having his own time taken up by this work.

It might be feasible for him to give authority for an assistant to certify all ordinary routine accounts.

The copy of the voucher which reaches this office should carry an original certificate, with details of the calculations and sub-vouchers for items of outlay.

I am, sir, your obedient servant,

The Deputy Minister, P.W.D. FREDERICK HAYTER, *for A. G.*

Wharfs and Piers.

North Bay: Pelee Island, Season 1908 ..... $ 134 05

Re **Public Buildings—Alberta.**

AUDIT OFFICE, OTTAWA, January 12, 1909.

SIR,—In your letter of December 9, 1907, it is stated that the public buildings in the province of Alberta had not yet been transferred to that province, but that negotiations were under way with a view of arriving at an agreement concerning that transfer.

I do not find that anything has come to account in connection with this matter.

Would there not be something due for maintenance and rent of buildings, incurred by the Dominion up to the date of the transfer?

If an agreement has not yet been reached in the matter, is it not desirable that it should be effected without further delay, and the payments therefor adjusted through the amounts due the province for provincial subsidy?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, June 8, 1909.

SIR,—I do not seem to have any reply to my letter of January 12, last, in reference to the transfer of the public buildings in the province of Alberta to the provincial government, and to the maintenance and rents thereof.

I have to ask for an early reply.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., June 10, 1909.

SIR,—I have referred your favour of the 8th instant, *re* public buildings, Alberta, to the accountant of the department for his immediate attention.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

Re **Sale Desks, &c., Post Office Building, Halifax.**

AUDIT OFFICE, OTTAWA, December 30, 1908.

SIR,—On Revenue Return No. 20, a deposit for $118.75 comes to account for proceeds of sale of desks, &c., from post office, Halifax.

The voucher furnished is the account of the auctioneers, James Duggan & Sons, in which they charge a commission of 10 per cent. Do you not think this charge is too high? This firm only charges 5 per cent for sales made for the Marine and Fisheries Department.

There are charges for advertising in three papers $33.60, for which no vouchers are furnished.

This account is certified by Mr. C. E. W. Dodwell, Inspector Public Buildings.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, January 13, 1909.

DEAR SIR,—With further reference to your favour of the 30th ultimo, I beg to inclose you receipted accounts for printing advertisement of sale of old desks, &c., from post office building, Halifax, as requested by you, together with copy of explanation from Engineer Dodwell regarding the commission paid of 10 per cent.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

HALIFAX, N.S., January 8, 1909.

SIR,—I beg to acknowledge receipt of your letter of the 4th instant, covering copy of a letter addressed to yourself by the Auditor General, in reference to sale of old desks, &c., from the post office building, Halifax.

Inclosed herewith I hand you duplicate vouchers for the two amounts, $9.80 and $23.90, respectively, paid by the auctioneer, Messrs. James Duggan & Sons, for advertising this sale.

In explanation of the commission of 10 per cent, I have to say that this is the usual charge for sales of this size, and even for sales three or four times the amount. Besides this, the auctioneers had the key of the building for nearly a week after the sale and had to go there three or four times to deliver the goods that had not been removed on the day of the sale. Under the circumstances, therefore, I considered the charge of 10 per cent a fair and reasonable one, and I certified the account.

I may say further that the auctioneers, on the day of the sale, had a policeman on duty, for which they make no charge.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. C. E. W. DODWELL, *Asst. Eng.*

Re **Auctioneer's Commission.**

AUDIT OFFICE, OTTAWA, February 3, 1909.

SIR,—On your Revenue Return No. 26, $1,010.43 was brought to account, being proceeds of sale of old furniture, &c.

The gross proceeds were $1,183.70, from which is deducted $54.90 for advertising, none of the vouchers for which are certified by the King's Printer, and $118.37 commission at 10 per cent. The auctioneer's account is marked 'Examined' and signed 'J. T. Routhier for Chief Architect.'

Five of the items disposed of were:

2 pumps	$ 86 00
1 pump	250 00
1 engine	375 00
Wrought and cast-iron	129 19
Brass	116 56

While a charge of a commission of 10 per cent may be reasonable enough for the sale of a large lot of old furniture, it seems extravagant on such items as the above.

Mr. Ewart certifies that the articles sold were of no further use to the department and were sold by auction.

Did he agree to pay a commission of 10 per cent on the whole sale, and does he consider it fair and reasonable?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, February 13, 1909.

SIR,—I have the honour to acknowledge the receipt of your letter of the 3rd instant, in reference to our revenue return No. 26, for $1,010.43, being the proceeds of the sale of old furniture, &c.

In reply to your inquiry respecting the item of $118.37, commission at 10 per cent on the above, I beg to quote the following explanation furnished by the Chief Architect in the matter:

'The commission usually charged by and allowed to auctioneers is 10 per cent' and while this might appear high for only the articles and materials enumerated in the Auditor General's letter we have to consider the fact that the sale comprised no less than 82 different items most of which realized no more than a couple of dollars each.

'I may say that under the circumstances, I consider the commission fair and reasonable.'

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secy.*

Re **Slide and Boom Dues.**

AUDIT OFFICE, OTTAWA, June 12, 1909.

SIR,—The slide and boom dues collected in the St. Maurice district in 1907-8 amounted to $45,433.21; in 1908-9 to $34,365.86, a decrease of $11,067.35.

Among the companies contributing to the dues in 1907-8 was the Union Bag and Paper Company, $6,285.07. Nothing appears to have been collected from this company in 1908-9. Please explain.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., June 15, 1909.

SIR,—Replying to your favour of the 12th instant, *re* slide and boom dues, St. Maurice district, I beg to say that the falling off in revenue, to which you refer, amounting to $11,067.55, is owing chiefly to the fact that a very large number of logs were hung up last season in consequence of low water, and particularly owing to the limited demand for pulp wood in the United States. A large number were intentionally held back by the owners and, moreover, there were practically no logs of the Laurentide Paper Company liable for tolls below Grand Mère, while there was quite a quantity in previous years.

The reason given me why the name of the Union Bag and Paper Company does not appear on the list for 1908-9, is that this company has amalgamated with the Grès Falls Company, in whose name the account appears for both companies.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

Re **Saguenay Boom Dues.**

AUDIT OFFICE, OTTAWA, June 9, 1909.

SIR,—I have to call your attention to the areas due by the Chicoutimi Pulp Company for boom dues on Saguenay river, amounting to $5,624.82.

These dues accrued as follows:—

Season 1906	$2,290 52
" 1907	1,801 00
" 1908	1,533 30
	5,624 82

I have to inquire why these dues have not been collected, and what action has been taken in reference thereto.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., June 10, 1909.

SIR,—I beg to acknowledge receipt of your favour of the 9th instant, calling attention to arrears due by the Chicoutimi Pulp Company for boom dues on Saguenay River, and beg to say in reply that the Department took action through Justice Department for the collection of these amounts but at present such action is stayed, a proposition of settlement having been made to the Minister which is having his consideration.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

Re **Slides and Booms: Arrears due.**

AUDIT OFFICE, OTTAWA, June 9, 1909.

SIR,—In my letter of September 23, 1908, your attention was called to dues accrued at Cheneaux boom, season of 1907, which had not been paid, as follows:—

Hawkesbury Lumber Company	$ 743 32
J. R. Booth	1,912 41
Shepard & Morse Lumber Company	434 56
Est. R. Hurdman	62 11

The reason given why these dues had not been paid was that the parties indebted had made a claim for a reduction.

In your reply, dated September 28, you stated the matter was having the attention of the department.

I do not find that these amounts have since been paid.

In addition to the above J. R. Booth is in arrears for dues at the same boom, accrued in 1908, amounting to $2,302.74.

This matter would seem to call for immediate attention.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Wharfs not transferred to Dept. Marine and Fisheries.

PUBLIC WORKS DEPT., OTTAWA, January 18, 1909.

SIR,—Referring to your letter of the 24th ultimo, in reference to the non-transfer of wharfs constructed by this department. I beg to say that the Hon. the Minister of Public Works took this matter up in council, where it was referred to the Hon. the

Minister of Marine and Fisheries to go carefully into the question and suggest some scheme for the transfer of these wharfs and the collection of tolls thereon. So far as my minister is aware, the Minister of Marine and Fisheries has not yet reported.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *D.M.*

AUDIT OFFICE, OTTAWA, January 20, 1909.

SIR,—The Deputy Minister of Public Works writes me that the question of wharfs erected by the Public Works Department which have not been transferred to your department, was referred by the Privy Council to Minister of Marine and Fisheries. He adds that, so far as his minister is aware, the Minister of Marine and Fisheries has not yet reported.

There are a considerable number of wharfs erected in recent years which have not been transferred and for the use of which no fees are being collected.

You will realize the necessity of the early attention of your minister to this matter.

I am, sir, your obedient servant,

The Deputy Minister, Marine and Fisheries. J. FRASER, *A.G.*

MARINE AND FISHERIES DEPT., OTTAWA, February 1, 1909.

SIR,—I beg to acknowledge receipt of your letter of the 20th ultimo, inquiring in regard to the transfer of wharfs to this department, and stating that you have been advised that the matter had been referred to the Minister of Marine and Fisheries by the Privy Council, and requesting that the same receive early attention.

In reply I have to inform you that there is no reference so far from the Privy Council to my minister on the above subject, but when such is received it will have attention.

I am, sir, your obedient servant,

The Auditor General. G. J. DESBARATS, *Act. D.M. M. & F.*

AUDIT OFFICE, OTTAWA, February 2, 1909.

SIR,—I wrote you November 28, last, in reference to the wharfs that have been constructed by the Department of Public Works in late years, and which have not been transferred to the Department of Marine and Fisheries, and in consequence no tolls were being collected.

On the 18th instant, the Deputy Minister of Public Works wrote stating that his Minister had brought the matter up in council, where it was referred to the Minister of Marine and Fisheries to suggest some scheme for the transfer of these wharfs and the collection of tolls thereon. On the 1st instant, the Deputy Minister of Marine and Fisheries wrote that so far no reference had been made by the Privy Council to his Minister on the subject.

I submit herewith copy of the recent correspondence in reference thereto.

The matter would seem to call for further attention.

I am, sir, your obedient servant,

The Secretary of the Treasury Board. J, FRASER, *A.G.*

	90,270 25
Less—Charged to 'Welland Canal, Colln. of Rev., Elevator Staff' (Page W—145	600 38
Total, carried to page W—2	89,669 87
J. A. Jamieson, Consulting and Designing Engineer: Plans, Specifications and Superintendence, Elevator, Port Colborne.	
3½ p. c. on $105,637.25, cost of sub-structure for 2 million bushel elevator	3,697 30
3½ p. c. on $1,100,000, estimated cost of superstructure for 2 million bushel elevator	38,500 00
⅛ of 1½ p. c. of $1,205,637.25 ($1,100,000 and $105,637.25)	6,028 18
$\frac{637}{1100}$ of ⅜ of 1½ p. c. of $1,205,637.25	6,581 72
	55,207 20
Paid as follows—	
In 1904-5 (W—22)	13,250 00
In 1905-6 (W—17)	16,054 65
In 1906-7 (W—13)	10,762 89
In 1907-8 (W—19)	6,460 90
In 1908-9 (W—28)	8,678 76
	55,207 20

Note.—The fraction $\frac{637}{1100}$ is used, as the amount expended for superstructure was $637,000 for an 50,000 bushel elevator, instead of $1,100,000, estimated cost of a 2 million bushel elevator.
